Projects

Trivia Quiz (Android App) - 05/2019

To get you started quickly, I've made a sample Trivia Quiz android application with a static set of textual questions with true and false answers for each of them. This can have at most one player for this sample quiz application. On choosing wrong answer, it make a vibrate and show a toast message to indicate that the chosen answer is incorrect and for right answer it just show a toast message.

Credit Card Application System (Standalone App) - 11/2020

A Java Swing + DBMS based, "Credit Card Application Portal (CCAP)" provides a platform for Users to avail a credit card by filling in the relevant details. Further, it enables them to manage card services in the application portal. The CCAP is aimed at taking a step forward towards digitalizing the entire process of applying for a credit card as well as managing the same.
